

Mario Andretti decides to take a trip to Wal-Mart on Route 33 (where the speed limit is 65 mph). Mario passes mile marker 12 and sees a state police officer with a radar gun. He looks down and notices he is traveling only 60 mph. Relieved, he continues on his way. 5 minutes later, he passes mile marker 6 and notices another police officer with a radar gun. Mario looks down and notices he is going 63 mph and drives by with a smirk on his face. Within moments, Mario gets pulled over by the second police officer. To Mario's dismay, the police officer (a former student of Mr. Novak) issues him a speeding ticket and proceeds to use the Mean Value Theorem to prove that he was speeding. What did the officer say?
